

## Wireless Mobile Digital Video Receiver (SD)

### Features:

- 4:2:0 receiving SD video without any loss
- Support ASI output
- Wireless WIFI network
- GPS positioning

### Application:

This product applies to live and command system, such as News, sport events, literature performance, security protection, emergency rescue, patrol and guard, rail transit, mobile network, data transmission, stereo monitoring, etc.

### Specification:

» Product Model:	» TL-WDS513W
» Product Name:	» Wireless Mobile Digital Video Receiver
» Receiving sensitivity:	» 20dBuV
» Tuner:	» Single channel/ double channel
» AGC dynamic range:	» 70dB
» Level range:	» ≥ 60dB
» Decoding mode:	» 4:2:0
» Audio/Video Data Format:	» MPEG-2
» Output:	» 4 channels analog video & 8 channels analog video

» MTBF:	» $\geq 10000\text{h}$
» Image Definition:	» NTCS:720X512 / 720X480 & PAL: 720X608 / 720X576
» Network Interface:	» Support WIFI network, RJ45
» Working Voltage:	» DC12V
» GPS Positioning:	» GPS
» Two-way voice:	» support two-way commanding
» Dimension:	» 290mm×260mm×118mm
